

Product Manager

Job Location: Hyderabad, India or Bangalore, India

Working at HSO India means working in a dynamic environment on challenging assignments. We are growing fast, and rapidly growing technology demands to pace with the growth in speed. We are focused on growing fast as a Microsoft Global solution integrator, but we opt to focus on qualities with our growth. If you are ready to work in a fast growing dynamic and flexible work culture, if learning inspires you, if you are proactive in taking responsibilities and processes problems solving skills, then HSO is the place for you.

The Product Manager is a senior-level position. As a Product Manager you will lead a team of highly skilled technical architects, functional consultants, developers, and test engineers to develop, manage and maintain key vertical solutions for HSO's product line on Dynamics 365 Finance and Operations. You will be responsible for building and expanding key functionality with feedback from customers and industry experts. The Product Manager is also responsible for the product planning and execution throughout the product lifecycle including: gathering and prioritizing customer requirements, defining product roadmap and release criteria and working closely with Sales, Marketing, Implementation and Support teams. The Product Manager will be ultimately responsible for customer satisfaction for the supported product lines.

Key Responsibilities:

- Involved in all stages of software development of Microsoft Dynamics product suites including functional design reviews, creating estimations, reviewing technical design documents, managing exit criteria's and release management in coordination with the Release Manager.
- Driving the solution set across multiple teams including Sales, Implementation and Support to gain feedback and prioritize features.
- Specify market requirements for current and future roadmap items.
- Create/Manage architecture diagrams/plans.
- Serve as the interface between the developers and the project manager.
- Act as a mentor for consultants and developers within the team.
- Communicate technical issues/decisions effectively to wider teams and Sponsor by using business terms.
- Hands on review and design support on key functionalities.
- Review requirements, provide designs and solutions, collaborate with developers for product development and conduct technical tests and acceptance.
- Ensuring effective coordination between development team and testing team.
- Provide and participate during backlog spring planning, create sprints and track task completion.
- Working closely with developers and a variety of end-users to ensure technical compatibility and user satisfaction.
- Involve in research, high level estimates, scheduling and task planning for current and all future sprints.
- Involved in project planning, solution roadmap development, scheduling and team development using Microsoft tools like DevOps.
- Creating logical and innovative solutions to complex problems .
- Facilitate project orientation, cross training, feature training, and maintain process standards across the cross section of projects.

- Provide inputs and participate on development strategy.
- Assist with feature demos and sign offs.

Requirements:

- Minimum 5 years Product Management experience
- Strong D365 F&O application knowledge
- Having proficiency in architecture, engineering, or construction (AEC) and other Professional Services industries is an added advantage
- Has strong interpersonal skills and often develops the architecturally significant components of the software system and/or interfaces
- Must have strong analytical skills
- Techno Functional background with exposure to Microsoft technologies including Azure, DevOps, Power Platform and supporting technologies

What HSO India is for you?

Our ambition is to help grow your career with a vibrant international company. We'd love to have you a part of the team, not just based on where you've been and what you have done, but where you can go and what you can do in the future. Working with a great flexibility of multiple locations, good company benefits and great training opportunities.
